NCHSE Fall 2021 Newsletter

NCHSE, a long-standing non-profit organization, represents health science state leaders who are responsible for middle school, secondary, postsecondary and adult career technical education (CTE) health science programs. Established in 1991, NCHSE supports visionary leadership, promotes best practices and speaks with a common voice to enhance high-quality health science education programs and pathways that ensure career success for the next generation of health professionals. Through partnerships with state education agencies, publishers and educational resource providers, professional associations, certification providers and the Health Science Educators Association (HSEA), NCHSE is positioned as the **national authority for health science education**

Welcome New NCHSE Members

State Education Agencies/Health Science State Leaders Category

NCHSE is pleased to announce the addition of the **new four stackable health science certificates** alongside the end of program, **National Health Science Certificate (NHSC)** as additional options for health science students. All certificates are aligned to the **National Health Science Standards (NHSS)**.

Four Stackable Certificates

Health science certificates measure and document students' prior learning and inform classroom instruction. By offering more choices, health science programs can choose certificates appropriate to meet the needs and intricacies of their individual programs. **Stackable certificate costs per student from NCHSE member states is \$10 and \$12 for non-members.** The National Health Science Certificate (end-of-program) is \$12 for NCHSE state members and \$15 for nonmembers through December 2021. **In January 2022, the end of program certificate cost will increase to \$15 for member states and \$20 for nonmembers.**

Our very own NCHSE Honorary Life Member, Bev Campbell is published!

of the National Healthcare Skill Standards and accompanying projects, products and training that were developed.

You're Gonna Die! My Journey to Survive

Jesse Campbell *In my own words* with Beverly Campbell

This story was written with two specific audiences in mind. The first, anyone diagnosed with a with a potentially life ending disease or injury to help them better prepare for the kind of care and treatment they might experience. The second audience, young people preparing for a career in healthcare learning about healthcare from a patients' point of view. Classroom instruction of the National Health Science Standards can be strengthened using specific instances throughout the book. Standard 2: Communications—the value of active listening to the patient; interaction between the patient, who may be experiencing fear and anxiety knowing their life may be changing or ending and the healthcare team that will be guiding them through each step. Medical terminology is woven throughout the story as are testing procedures and results. Standard 4: Employability Skills—the four primary medical specialists in the *Life Savers* chapter describe why they chose their specialty and what led them to that decision. Technical Skills and Safety Practices are addressed in the care provided in a variety of healthcare settings; inpatient acute care, home care and clinics are all described by this patient.

To order the softcover book (114 pages):

www.gorhamprinting.com/my-journey-to-survive

What a compelling journey of pain and heartbreak in the face of a terminal illness with a very limited life expectancy. Jesse's perseverance through the torment of medical treatment, along with the support of his loving family, this guy has beaten the odds.

— Nancy Allen, National Consortium for Health Science Education Executive Director

Forthcoming in 2021-2022

- Biannual NCHSE Member Update Call: Thursday, October 7, 2:00-3:00 PM (ET)
- 2022 Annual Meetings - [Charleston Marriott \(SC\)](#)
 - NCHSE Executive Council: Monday, January 24

- Excitement, intrigue, and a successful new website launch is planned for the fall of 2021!
