

NCHSE – HSEA Wednesday Webinars
Fall Semester 2023

*Webinars are recorded and archived at healthscienceconsortium.org/webinars/
 Live attendees receive a certificate of participation for an hour of professional development.*

Date / Time	Title	Presenter(s)	Register
September 13 4:00 – 5:00 PM (ET)	Interactive Learning with Virtual Patients: Aligning with the Latest National Health Science Standards	Raquel Bidarra Carolina Ferreira Body Interact NCHSE Member	Register
Description	Join this interactive webinar on integrating virtual patient simulations into health science education, aligned with the latest National Health Science Standards. Hosted by Body Interact, this webinar is for health science teachers who want to enhance their teaching and engage their students with experiential learning. Our virtual patient simulations cover a wide range of topics and offer a unique opportunity for students to apply theoretical knowledge to real-life scenarios. Learn new strategies to maximize learning outcomes and prepare your students for successful healthcare careers!		
September 20 4:00 – 5:00 PM (ET)	Reveal Party Version 7.0: NCHSE Health Science Curriculum Enhancements	Rhonda Evatt Katrina Haynes Resource Authors HSEA Members	Register
Description	A must-have classroom resource has been aligned to the updated National Health Science Standards (August 2022). Refreshed with content outlines, PPTs, activities, projects, videos, websites, and test items, this learning tool provides unique strategies for teaching the NCHSE industry-recognized standards. Developed by teachers for teachers, you will want to attend the reveal party to hear about the re-energized resource.		
September 27 4:00 – 5:00 PM (ET)	Prepare Health Science Students for Certification Success!	TBA Chandler Neal iCEV NCHSE Member	Register
	With the recent acquisition of AES, iCEV now offers preparation content for certifications not hosted on our platform. These materials align with dozens of industry certifications from providers such

	as NHA, NCHSE, NOCTI, AMCA, and more. Join this session to learn how to effectively use these resources in your health science courses to ensure your students' success!		
October 11 4:00 – 5:00 PM (ET)	Teaching Gen Z and Microlearning on TikTok	Kristina Westphal Nicolas Weiser Dean Vaughn – Peterson's NCHSE Member	Register
Description	Get strategies for teaching Gen Z and how educators can harness TikTok's popularity to teach students in and outside of the classroom.	10/11/23 Melissa	
November 1 4:00 – 5:00 PM (ET)	All Certifications are the Same, Right? How to Evaluate a Credential?	Mary Spilia American Medical Technologists NCHSE Member	Register
Description	Allied health certifications are available through different sponsoring agencies for essentially the same role. Does it make a difference which you offer students? If you're preparing students to get certified for allied health careers, you have an interest in ensuring that the credential they earn meets the standards in demand by employers. Get an inside look at criteria you can use to evaluate the quality of a certification. Learning objectives: 1. Learn how to judge the quality of an entry-level certification that serves your students. 2. Understand variations in standards for certification credentials from different sponsoring agencies. 3. Find out how to help students complete certification for jobs as they start careers or continue schooling. 4. Learn about the rich resources proven to help students reach their goal of a professional credential in allied health.		
November 15 4:00 – 5:00 PM (ET)	Biotechnology: A New HOSA Competitive Event and BACE, the Nationally Recognized Biotechnology Certificate	Damon Tighe Tammy Mandrell Bio-Rad Biotility NCHSE Members	Register

NCHSE – HSEA Wednesday Webinars
Fall Semester 2023

*Webinars are recorded and archived at healthscienceconsortium.org/webinars/
 Live attendees receive a certificate of participation for an hour of professional development.*

Description	Biotechnology plays an important role in healthcare from nutrition to cutting edge genes therapies. A HOSA new competitive event was rolled out this past year with great success that allows students to dive deeply into this fast-growing field. Get an overview of the industry's history, current, and future landscape in addition to details about the HOSA competitive event. We will also explore the Biotechnician Assistant Credentialing Exam (BACE), a nationally recognized credential that students would be well qualified to sit for after preparing for Biotechnology, the HOSA competitive event sponsored by Bio-Rad.		
December 6 4:00 – 5:00 PM (ET)	TBA		Register
