Summer Seminar: Your Impact Echoes

presented by Health Science Educators Association

Wednesday, September 16 | 5 PM ET

Health Science Classroom to Career

presented by Rachelle Blinoff-Mudd with iCEV

Preparing students for careers in healthcare requires more than just instruction, it takes a complete system designed to build knowledge, measure growth, and support workforce readiness. Join us in examining how iCEV Health Science can support aligned programs of study while gaining the technical skills, employability skills and industry preparation needed for success after graduation.

Wednesday, October 14 | 5 PM ET

Beyond the Lecture: 7 Movement-Based Strategies to Turn Traditional Lessons into Active Learning Experiences

presented by Victoria Huber with Central Westmoreland Career & Technology Center

Health science students are preparing for hands-on, fast-paced healthcare environments, yet many classrooms still rely heavily on lecture and passive learning. This session demonstrates how to transform traditional lessons into structured, movement-based learning experiences that improve engagement, retention, and real-world skill application.

Wednesday, November 4 | 5 PM ET

Preparing the Allied Health Workforce of Tomorrow: What CTE Programs Need to Know for This Year and Beyond

presented by Mark Adamiak and Laura Flynn with the National Healthcareer Association

In this webinar, we'll unpack insights from NHA's 2026 Industry Outlook to explore how expanding scopes of practice, employer expectations around certification, and career pathway design are reshaping allied health education. Learn how CTE health science programs can better align curriculum, credentials, and work-based learning with what employers need and prepare students for long term success in healthcare careers.

Wednesday, November 18 | 5 PM ET

Bring Teaching to Life: Building Engaging Medical Assisting Programs That Prepare Students for Success

presented by Denise DuBois with RealityWorks, and Kathy Cilia with AMT

In this webinar, secondary and postsecondary health science educators will hear about proven teaching strategies, effective lesson ideas, and key considerations for starting or strengthening a program. Using the approach, "If you were advising an educator launching a new medical assisting program, what would you recommend?" presenters will share practical insights and best practices that help bring healthcare education to life.

Building Clinical Judgment Early: Teaching Students How to Think Like a Healthcare Professional

presented by Hannah Schroeder and Denise DuBois with RealityWorks

Employers need graduates who can think critically, not just follow steps. This webinar will move beyond task completion to help students develop clinical reasoning and decision-making skills through structured simulation. During the session, we will cover clinical judgment frameworks, use simulation scenarios to prompt critical thinking, and facilitate reflection and guided decision-making.

Wednesday, February 3 | 5 PM ET

Explore Project Lead The Way's Biomedical Science Program: Preparing High School Students for College and Career Readiness

presented by Kate Ashley with Project Lead The Way

Get to know Project Lead The Way's robust 5-course sequence Biomedical Science Pathway for high school students in grades 9-12. PLTW Biomedical Science empowers students to build knowledge and skills in biomedical science, as well as in-demand, transportable skills like problem solving, critical and creative thinking, communication, and collaboration.

Wednesday, February 17 | 5 PM ET

From Classroom to Clinic: Best Practices for Credentialing Success Through Simulation and Student Leadership

presented by Sophia Johnson with ACCEL Academy-Mobile

Preparing students for healthcare careers requires more than content knowledge, it demands real-world application, structured skills training, and leadership development. This session highlights best practices for transforming a health science classroom into a credentialing-focused, simulated clinical environment that increases student engagement, accountability, and certification success.

Wednesday, March 10 | 5 PM ET

Starting Strong in Health Science Education: Strategies for New Teachers

presented by Kimberly Trotter with the Little Rock School District

This interactive webinar is designed to support new Health Science teachers with practical classroom strategies, engaging instructional ideas, and ready-to-use resources that can immediately be implemented in middle or high school classrooms. The session focuses on classroom management, student engagement, hands-on learning, and career-focused instruction in Health Science pathways.

Wednesday, April 7 | 5 PM ET

uBEATS: Free Online Modules Supporting Health Science Education

presented by Sarah Shaffer with the University of Nebraska Medical Center

This webinar introduces uBEATS (UNMC and UNO Building Excellence in Academics Through STEM), a free online library of standards-aligned modules covering a wide range of health science and STEM topics. Participants will learn how uBEATS supports skill development and career pathway exploration through interactive e-learning and digital badges that recognize student learning.
